

Activate small group learning

Activate and Pods allow teachers to listen and learn, revealing critical insights in instruction.

With real-time feedback into the learning process, teachers gain the insights needed to activate learning for every student. Now teachers can monitor each group, reinforce and redirect when needed.

Combined with a Flexmike and whole-class audio system, teachers can instruct and support all students.

- Up to 12 pods for each group
- Control via mic or mobile app
- Enable student sharing from each pod

Are they on task?

Which students are my leaders?

Who is participating?

Where are the breakthrough moments?

What's their learning process?

Teachers must know where to invest their attention.

With multiple groups, learning moments and teaching opportunities are ever present but often missed. Activate reveals critical insights across the classroom:

Direct instruction

Address the whole class or any small group to instruct, reinforce or redirect.

Monitoring

Listen to group conversations without changing the group dynamic.

Small group sharing

Empower students to share with the class, using the Pod as a microphone.

Capturing video

Capture and share audio and video of critical teaching and learning moments.

Small Group Instructional Audio

With up to 12 pods, teachers can monitor each student group inside or even outside the classroom in shared learning spaces.

The 2-way audio pods allow teachers to listen to and monitor the groups, and empowers students to collaborate with each other and share with the whole class.

1 Flexmike
TEACHER MICROPHONE TO TALK TO THE WHOLE ROOM AND MONITOR EACH GROUP

2 Activate
CHARGES COMPONENTS AND CONNECTS TO MOBILE DEVICES AND MULTIMEDIA

3 Whole Class Audio System
CONNECT TO REDCAT, TOPCAT OR 975 WHOLE CLASS AUDIO SYSTEMS TO BROADCAST THE TEACHER'S VOICE FOR ALL STUDENTS TO CLEARLY HEAR

4 Small Group Audio Pods
2-WAY PODS SIT ON THE TABLE WITH EACH SMALL GROUP TO ALLOW TEACHERS TO MONITOR AND SPEAK TO EACH GROUP

5 Flexible Control
SELECT PODS AND STUDENT SHARING FROM THE MICROPHONE OR MOBILE APP

6 Audio Integration
CONNECT ACTIVATE TO MEDIA FOR WIRELESS TRANSMISSION TO CLASSROOM SPEAKER

Capture video with audio from your mobile device

The Activate App overcomes a device's inability to capture quality audio beyond a few inches of the built-in microphone. High-quality audio synched with video from the teacher microphones and pods allows you to:

- Self-record whole class instruction for high quality lesson capture
- Select a pod to capture student learning moments
- Record teacher and student interaction
- Record audio only to capture inconspicuous evidence of learning

Key Activate Features

- Connect up to 12 pods for small groups
- 2-way audio between teachers and students
- Two Bluetooth channels for team-teaching
- Wireless audio integration (4 audio inputs for connection to other media)
- Video and audio recording of teacher microphone and student pods
- In-app photo capture
- Access Technology + Bluetooth interface
- Teacher call button on Pods to request assistance
